
V2.62.r07 Dvr Software [UPD]

Apr 13, 2013 - My dash cam's current software shows System/Build as V2.62.R07 / 2011-03-16 11:26:24. I'm trying to find an updated firmware, hoping for the best... I don't know which firmware version will work. I had permission issues and it didn't fix it. I can reboot it and restart but it doesn't work. It only has one fixed grid with resolutions: 1280x720 720x480 etc. I know it will have a motion sensor and GPS installed, but it can't find the GPS. I used GNOME 3 Upgrade to upgrade but couldn't find new firmware so I tried to upgrade and start the system from scratch which worked fine.
