Clickbait From YouTube  
In this video I will show  
you how to Remove  
Clickbait from YouTube  
with the Clickbait  
Remover Firefox  
extension. If you are not  
familiar with the concept  
of clickbait, here is an  
excellent post from Angry  
Tech Guy that explains  
the basics of clickbait,  
and why it's bad for you.  
What is Clickbait? How  
does it work? The concept  
of clickbait is very simple.  
Clickbait basically refers  
to headlines that are

---

designed to get people to click on an article just by reading the headline itself.

There are a number of businesses and individuals who use clickbait to make money, and when you click on the headline, you probably end up on their website, and pay for their product or service. Why is Clickbait bad? The main problem is that you are probably not at all interested in the content on that website. The website usually has very low quality, and is a way

---

to generate the most amount of money for the creator. And there's another problem: you should always focus on quality when you're surfing the Internet. Quality content like text, images, videos and other types of content that are important to your life. And clickbait doesn't help you in your daily life, as you might find yourself surfing through ridiculous websites, 1d6a3396d6

Remove annoying clickbait on YouTube using this simple extension. This extension replaces annoying clickbait thumbnails with common previews of videos instead. You can also choose what kind of clickbait the extension should handle: all caps titles, all lower case titles, titles with just the first letter capitalized. You can also easily manage the settings. Features: -

---

Remove all annoying  
clickbait thumbnails from  
YouTube - Automatic  
thumbnails: let the  
extension choose the right  
thumbnail depending on  
the video - Easy to use:  
single click on the icon  
will do the job - Easy to  
set up - Use the ones you  
want: you can remove the  
whole thing and replace it  
with a thumbnail of your  
choosing - Customized to  
suit your needs - Have fun  
watching videos without  
annoying clickbait -  
Remove all annoying

---

clickbait on YouTube in  
seconds YouTube  
Clickbait Remover/Filter  
is a cross-browser  
extension for Firefox and  
Chrome. YouTube  
Clickbait Remover/Filter  
is a simple yet powerful  
extension that does not  
require any setup. Once  
installed in your Firefox  
browser, the extension  
automatically removes all  
silly or over-the-top  
thumbnails designed to  
grab your attention. As  
mentioned before, it  
replaces them with still

---

fames selected from the video itself. Here's the best part, though: it replaces them with frames selected from the video, either from the start, middle, or end of the video, at your discretion. And, that's not all, as the extension also provides you with the option of formatting the video titles. You can choose to have titles written only in lowercase, or capitalize only the first letter. A single click on the extension's icon is

---

required for you to have full control over how clickbait-related content is presented in Firefox. All this can be easily done with a simple one-click extension. Lets you decide what's the right amount of clickbait on YouTube

While we are not here to discuss the ethics of clickbait, we will only say that clickbait is not exactly bad if used right. The beauty of this extension is that it provides you, the user, with the power to decide

---

exactly what this limit between “too much” and “just right” should be regarding the whole YouTube clickbait situation. Description: Remove annoying clickbait on YouTube using this simple extension. This extension replaces annoying clickbait th

**What's New In Clickbait Remover For Youtube (Firefox)?**

Clickbait Remover for YouTube is an extension that replaces all clickbait thumbnails with images

---

selected from the video itself, instead of displaying a title in all caps. Clickbait titles are annoying and detract from the experience of watching the video.

Sometimes people click on a link without realizing that the page is just some “clickbait”. The Clickbait Remover extension helps to reduce the problem.

Clickbait titles that should be replaced include:

Caption and title in all caps, captions with short lines, only clickbait in

---

lowercase, and only  
clickbait in upper case.  
Clickbait thumbnails that  
should not be replaced  
include: Videos that have  
no caption or title (content  
description = title),  
captions that appear more  
than once, captions and  
titles with short lines, only  
the actual thumbnail, or  
only the music. How to  
install Clickbait Remover  
for YouTube Step 1:  
Download the extension  
to your computer. Once  
the download is complete,  
open the folder where you

---

downloaded the file and you will see a folder named “Clickbait”. Step 2: Open the Clickbait folder and drag the folder to your browser’s extensions folder. You will see a new menu item appear in your browser. Step 3: Click the new menu item to enable or disable the extension.

## How to use Clickbait Remover for YouTube

After installing Clickbait Remover for YouTube, all clickbait thumbnails will be replaced with the

---

actual video preview.  
Here's how it works:  
Before: After: As you can see in the above example, clickbait thumbnails were replaced with the video preview. The titles also became more appealing by reformatting the titles to display only the beginning letter (first letter of the first word in the title), and not all in caps. If you're using Firefox, you can also add a title to the middle or end of the video. This makes sure your title is always in

---

the middle of the thumbnail, instead of at the top or bottom. To add a middle title: To add an end title: This makes sure you have complete control over what “clickbait” you're viewing and helps you decide what is the right amount of “clickbait” for your YouTube experience.

Steps to make thumbnails look more natural: Step 1: Go to YouTube and search for a video you'd like to watch. Step 2: Open the video in a

---

browser (any browser).

Step 3: Right click

anywhere in the video and

select “View Page

Source”.

---
