**Aero Enabler Download Latest**

Aero Enabler is a graphics tweaking utility for the users that requires no prior knowledge of the DOS commands. All you need to know is a set of setting in Windows that will enable its effects and how to manipulate it. The application comes with a set of features and tweaks that are widely used in graphic enhancing applications, like the Aero feature. Aero Enabler – The Basics: This is a small utility with a straightforward and easy to use UI. Aero Enabler features a setup wizard, which allows the user to set some crucial details about the

---

application. Additionally, you are able to control Aero, as well as all other graphics tweaks that are possible. Here, you can enable/disable Aero and controls its 'opacity'. You can set new settings for its' angle (number of degrees) and the transition speed (2 values – 0 and 1). You can also enable or disable the 'dim' and 'shade' effects. 'Dim' is responsible for reducing the color depth of the window with the 3D effects applied on it. This has the effect of dulling the color in the windows. 'Shade' is a lighter version of dim. It brings almost no effect to the windows, unless you have a legacy display with the Gamma of less than 0.6. In this

---

case, the difference will be in a few percent. You can test the effect by opening several windows at once. You can also set a 'Title bar' effect that will look like the Aero effect is disabled and the title bar is showing. This can help you with problems like 'bad fit' for small windows. You have the possibility to set a 'minimize in tray' option, which will make the application launch in the system tray, a quick and convenient way of accessing it. Here, you can enable/disable the use of the highlight effects. Highlight refers to the visual enhancement that the title bar or window frame has when you mouse over it. It makes the windows much

---

more recognizable. You can also adjust the delay before the animation occurs. You can ‘Speed’ and ‘Opacity’ the animations. ‘Speed’ gives the time the translucency is present, while ‘Opacity’ gives the effect of the transparency. Finally, you can also set the ‘bitmap mode’, which can be
