I have absolutely no idea of how to start with this and a very limited knowledge of the iPhone SDK. If anyone could point me in the right direction it would be much appreciated. Thanks A: You'll have to use CoreGraphics to create the shapes. Apple has some tutorials on that here. The example for using a view to draw the shapes is here. Q: Is the C# equivalent of PHP's htmlentities used? In PHP, it is possible to use htmlentities. \$str = 'Test'; // Escape single quotes, double quotes, and newlines \$str = htmlentities(\$str); Is it possible to make use of this in C#? EDIT: By this I mean: string str = "This is some test"; // Escape single quotes, double quotes, and newlines string str2 = Html.Encode(str); A: You should read this article to learn about the issues with Html encoding. Also, you can use the syntax. Note that you cannot use raw string literals (), which is something you would have to use in PHP. , 789 F.2d 880, 884 (6th Cir.1986), cert. denied, 479 U.S. 1067, 107 S.Ct. 955, 93 L.Ed.2d 1003 (1987) (same).
